

EXPERIENCE

Machine Learning Engineer RealityMine, Manchester, UK - Migrated transformer-based models from Azkaban to Airflow, modernising ML orchestration and deployment. - Added contrastive learning to the model, improving accuracy by ~8%. - Designed Auto-Research — a CLI for autonomous ML experiments with Claude and OpenAI.	<i>Apr 2026 – Present</i>
Software Engineer RealityMine, Manchester, UK - Built an AI-powered server management tool that autonomously triages errors and remediates, cutting MTTR from ~60 minutes to minutes. - Built an agentic tool that converts raw web-traffic captures into extraction code, eliminating ~20 hours/week of manual analysis. - Optimized a ~600 GB/day data pipeline (~86% throughput gain); cut legacy alarms/crashes by ~95%.	<i>Dec 2024 – Apr 2026</i>
Founder Acumei (acumei.com), Manchester, UK - Building AI automation for British SMEs — agentic pipelines for calls, dispatch, rebooking, stock, and invoicing across CRM/POS/diary. - Shipped production integrations with 7× weekly rebookings; end-to-end builds in 3–14 days with GDPR-compliant data handling.	<i>Feb 2026 – Present</i>
Founder & CTO Ovalens (ovalens.com), London, UK Raised £7k via hackathon win. Deterministic UK tax engine (16 modules); Claude chat with 6 tools; 30+ APIs, Redis, 280+ tests, Sentry.	<i>Jan 2026 – April 2026</i>
Research Intern Google DeepMind, Birmingham, UK Co-developed AMRAG (self-checks + web search), improving response accuracy by 88% with sub-5-second latency.	<i>Jul 2024 – Aug 2024</i>
Teaching Assistant Aston University, Birmingham, UK Mentored 10+ student teams in OOP and led 8+ workshops (30–50 students per session).	<i>Oct 2023 – Jul 2024</i>

EDUCATION

Aston University, Birmingham, UK BSc Computer Science (<i>First Class Honours, 4.0 GPA</i>)	<i>Sep 2021 – Sep 2024</i>
---	----------------------------

SKILLS & CERTIFICATIONS

GenAI: AWS Bedrock, LangChain/LangGraph, LlamaIndex, Pinecone, pgvector, PyTorch, Hugging Face, OpenAI API, Claude API
Stack: FastAPI, Django, Flask, Spring Boot; React, Next.js
Infra/Data: AWS, Docker, Linux, CI/CD, Airflow; PostgreSQL, MySQL, MongoDB; Firebase, Redis, RabbitMQ
Languages/Certs: Python, Java, JavaScript, C#, PHP, C++; Google Cybersecurity Certificate; AWS Solutions Architect (in progress)

PROJECTS

Chainwatch (Open Source) Local-first npm supply chain risk analyzer with provenance verification, compound risk scoring, and MCP; 138+ tests incl. red-team sims.
Donald (heyitsdonald.com) Voice CV coach (Claude, ElevenLabs, Firecrawl); FastAPI, Next.js, PostgreSQL, Redis, Celery. ~40k views in 72 hrs, 300+ users.
GalleryGen (ElevenHacks Winner) AI-curated walkable 3D gallery with Claude curator agent (tool-calling); react-three-fiber, Express/Prisma, FastAPI vision.
Nova (Saturn Hackathon Winner) AI OS for accountants: multi-agent document processing, compliance/VAT checks, duplicate detection, and tool-calling chat.
BRRR Agent (Claude Plugin) Python Claude plugin for property search and BRRR analysis — deal screening with full price breakdown (purchase, rehab, rents, cash flow).
GetOut Voice/text social wingman: events and similar users via embeddings; LLM tool-calling on Cloudflare Workers (D1, Vectorize, Durable Objects).
Fixie Turns PDFs/URLs into guided voice repair walkthroughs; FastAPI, Next.js, Celery, Claude, and ElevenLabs.
